## After considered examination of the thesis, my recommendation is:

### **1. Award**

The thesis meets all required standards in terms of the nature and quality of work undertaken, and the degree can be awarded without any further work by the candidate, other than the correction of typographical errors and small lapses of expression and presentation in the final copy.

### **2. Award (after corrections)**

The thesis meets all required standards in terms of the nature and quality of work undertaken, and the degree can be awarded without further examination once the candidate has made a number of corrections and clarifications in the thesis.

### **3. Revision and Re-examination**

The thesis does not yet meet all required standards for the award of the degree and the candidate should complete a further period of research and writing. Normally, under this category, a candidate would re-enrol for a period of up to one year full-time (or equivalent). The thesis will then be submitted for re-examination.

### **4. Not award**

The thesis does not meet the required standards for the award of the degree and does not warrant a further period of research and writing.
